LOS ANGELES, April 7, 2020 /PR Newswire/ -- In an effort to help limit the spread of the SARS-CoV2 virus causing COVID-19, ushealthfairs.org, a Los Angeles-based 501(c)3 non-profit organization, and its clinical outreach arm ushealthclinics.org, announced today that they are **providing expedited testing of first-responders, senior citizens in retirement communities and the general public who have been exposed to the SARS-CoV2, Novel Coronavirus**. The charity will test a patient at their workplace or via house-calls, by using telemedicine and the diagnostic tests of LabCorp, Quest Diagnostics and Fulgent Genetics laboratories.

FACT: Being able to hold your breath for 10 seconds
DOES NOT mean you are free from COVID-19.

The best way to confirm if you have the
Coronavirus causing COVID-19 is
laboratory testing. NOW AVAILABLE at:
www.ushealthfairs.org

US HEALTH FAIRS

US Health Clinics.org is providing house-calls and workplace testing for the general public who have been exposed but are not demonstrating symptoms like the Police, EMS, Fire fighters, nurses and retail store employees who have been in contact with people who have

the COVID-19 disease. "[Book-A-Test](#)" and a team member will facilitate a telemedicine consultation with a licensed US Health Clinics.org medical doctor, collect a specimen to send to LabCorp who is providing the service of testing for COVID-19 under [emergency use authorization \(EUA\)](#), as permitted by the Food and Drug Administration (FDA). Patients can receive COVID-19 test results in 24 hours by text message, if desired.

"Rapid identification of individuals with this virus is one of the most important interventions to mitigate the impact this virus has on our country. If you test positive for the virus you can do your part to limit its spread by quarantining yourself. If you test negative for the virus then continued social distancing is mandatory to prevent any further spread. Ultimately the people in our communities will decide how much COVID-19 hurts us as a country," said Dr. Camellia Babaie, Chief Medical Director for US Health Fairs.org.

As a 501(c)3 non-profit organization, US Health Fairs.org relies on donations from the community to operate. To combat the SARS-Cov2 virus, they are asking patients to contribute a tax-deductible donation to cover the cost of the testing. Without the donations, it would not be possible to purchase the crucial medical supplies from companies like Puritan Medical, 3M, Remel (Thermo Fisher Scientific), BD (Becton-Dickinson) and McKesson and these patients would not be able to be tested by US Health Clinics.org.
